

Place: Dharavi

Date: 12/3/17

We went to different houses for survey from that we got many experience .I like to share some interesting experience from we came to know why student going to BMC school .

On first day we went to different house from that one house the children father was handicap and mother used to take care of their children that why they send their children to BMC School

In the second day we went to different area the place was very untidy and small the place was very untidy and small the house was too small and in that house 8 to 9 member would live. In that day we went to a family .she doesn't know the detail about their children her son came and said information which we needed

In the third day we went to different house in majority of houses we sawed that boy are send to private school and they some people who having boy children they send in English medium

And we walking to a area and their a house who student went to BMC school if their children doesn't like to attend or teacher doesn't come they used to walk out from the school we asked their father and the conversation was in this way

ME: uncle apka beta BMC school jatha

UNCLE: haan woh yehe BMC school jaa raha voh hey paas me he na who vala

ME: accha voh sant kakkaya

UNCLE : woh hi

ME : uncle unka padhai kaaise hey aap use satisfy ho kya

UNCLE : who hena uska teacher kabb nahi aati tho voh log school se chal aaj rafatha

(my student used to go to school if they teacher doesn't come or they go or training they would come back home at recess)

In one house a lady was saying that they would come and go to their village twice in a year because sometime he wont be good that time she would go their mother house which is located in village and she also take their children In this way their student lack in their education
