

Date: 16/02/17

Area: Dharavi

On 16th February 2017 we went near Transist camp and Sant Kakkaya Marg. There were most of the students who were studying in Sant Kakkaya School. When we did survey in that area we came to know that most of the parents are dropout and uneducated. Due to lack of awareness and poverty. In most of the family the number girl child is more. There was a family where there are 5 girl children and one boy. In most the families boys have been educated well and most of the girls are dropout.

In one of the family the mother of the family of the child she don't even know the name of the school where his children are studying. she was searching for the progress card to check the school name.

In another family due to poverty they made 2 children to study in the native place as they cannot pay fees for all the children In Many families children don't know their grandfather and grandmother's name, education, occupation and income.

Area: Dharavi

On 17th February 2017 we went near Subash Nagar area in Dharavi. There were many families with the children studying in Municipal School.

I went to a house there was a lady she was not able to speak Hindi so her neighbour was translating to us and her. she was not ready to give information to us. We talked to her and explained about the survey and then she said "ok ask fast I don't have enough time". As we started asking questions she was completely blank she don't even know her husband's name. and she said "she don't know anything about her husband's family background."

There is no toilet facility in most of the houses. They are using public toilet. Most of the families are migrant for better job. Many people don't know the actual income of their husband.
